

Trailblazing Technology

*to help you reach peak
performance & profits.*

QFloors' award-winning software is at the top of our field, with what it allows you to do. Our cutting-edge, super-cool technology is so user-friendly, anyone can learn it. Our software's sole purpose? Making your life easier and your business more streamlined, efficient, and profitable.

Here's one example: Right from the sales floor, you can pull up the current inventory of a product at the manufacturer's or distributors' warehouse. QFloors will instantly show the status of all related products (glue, trim and end pieces, etc.) as well. You can then talk availability with the customer and schedule the job, right then and there. You close the sale quickly, and come across as professional, responsive, and organized.

No other flooring or accounting software currently offers that capability. Only QFloors.

So forgive us if we shout it from the mountain top. We just think everyone should enjoy the view from here.

We'd love to show you what we can do. Contact us today.
