NETWORK

General Information

- We strongly discourage using wireless networking and wireless Internet.
- Will not work over a VPN connection due to extremely high volumes of data transfer.
- *QFloors Sybase* uses a Sybase™ database engine. Therefore, it will not install on a server that has a version of QuickBooks™ installed (and possibly other programs) that also runs on a Sybase™ database engine. *QFloors SQLite* will not have interference with QuickBooks™.

1 – 5 Workstations, Single Location:

- Peer-to-peer network is acceptable, or dedicated server configuration.

6 or More Workstations, Single Location:

- Dedicated server configuration.

Multiple Locations

- QCloud remote hosting by QFloors, or your own server with Windows Remote Desktop, or other remote connection utility/software. Remote Desktop may require more RAM and other system resources. Consult your computer/network administrator.
